Rules of life of wild animals / D. Kleshnin — «Издательские решения»,

ISBN 978-5-44-984065-3

“Rules of life of wild animals” is a book of lessons from wild animals from the red list. Everything is changing, including us, and only the inhabitants of the wild remain stable and calm. Perhaps this is because they live in harmony with themselves and nature. Or maybe because animals know the secret of the universe... Let 's imagine that this is so.

# Rules of life of wild animals

## Dmitry Kleshnin

*As a child, I loved watching animal shows where you could get to know the rare inhabitants of our planet. Many years have passed, and I'm still interested in wild animals.*

*Everything is changing, including us, and only the inhabitants of the wild remain stable and calm. Perhaps this is because they live in harmony with themselves and nature. Or maybe because animals know the secret of the universe... Let's imagine that this is so.*

*I hope that in this book the reader will find some useful tips from the beautiful inhabitants of the wild. And that one day we will all live in peace and harmony with ourselves and nature.*

*Dmitry*

MAKE FRIENDS  
WITH GOOD PEOPLE

DAURIAN HEDGEHOG ©

**The Daurian hedgehog** always knew how to be friends. He can find a friend in the steppe, in the taiga, in Transbaikalia, in China, and in Mongolia. And although the size of the Daurian hedgehog can reach only 30 cm, among his friends can be a bear and even a huge elephant. How does he manage to make new acquaintances? The answer is obvious. First, the Daurian hedgehog has a friendly character and non-prickly needles. Therefore, it is always nice to talk to him and iron. Secondly, the Daurian hedgehog is always dressed in a neat light beige suit made of stiff and short wool on the abdomen and legs, and its back is decorated with light needles.

DO NOT BE AFRAID  
PUT BEFORE YOURSELF  
REAL PURPOSE

CAUCASIAN FOREST CAT ©

**The Caucasian forest cat** always sets real goals in the countries of Eastern and Western Europe and Central Asia. Little is known about them, and there are reasons for this: a secretive lifestyle, hard-to-reach habitats, and an extreme lifestyle.

If a plane with parachutists soared into the sky, it means that there is a Caucasian forest cat preparing to jump. If there is a steep snow-covered slope, it means that the snowboard of the Caucasian forest cat will leave its mark on it. It always does. If there is something to do and conquer, the Caucasian forest cat will be there. And if you can't see it, then the camouflage pattern of the animal's fur is to blame.
